We are not anxious to get in a situation where you are not 100% behind any analysis EPA does.  
Let's schedule a call to discuss the AM vs GM issue before doing any work on that.  
Do you want to propose a time earlier than June 18/19?

**Subject:** RE:

Bill, We believe using the GM in this case is better than the AM but are willing to do the AM if that is what you want.

Tim

**Subject:** RE:

I think preparing the graphs described in Issue 1 would be fine to go ahead with. With regard to issue 2, we want to be sure you do not have any concerns or issues with using the AM rather than the GM before going to all the work of revising the JEM. If you do not have any concerns, then yes, let's go ahead. If you think this may not be appropriate, then let's talk first.

Bill,

We would like to begin immediately implementing your proposed alternate methods for these 3 areas of concern rather than waiting until for June 18/19.

Let me know if that's ok.

Thanks

Tim

Tim

Three issues have come up regarding the Marysville data set we would like to discuss with the UC team (or at least the most appropriate members of the team). These 3 issues are summarized in the attached Word document.

EPA is available to discuss the issue all day on June 18 and 19.

I hope that this will be acceptable, since Bob will be gone for a week following.

Please let us know what day and time will work best.

Here is a call in number to use:  
Call number: 1-866-299-3188  
Pass code: 303-312-6712#
